

# NFMA Operating Data Guidelines

## Solid Waste Transactions

The following template derives from *NFMA Recommended Guidelines on Operating Data*. This constitutes a capsule summary of the operating data and utilization statistics set forth in the *NFMA Recommended Best Practices in Disclosure for Solid Waste Transactions*. To obtain complete guidelines on disclosure information, issuers and obligors are encouraged to consult sector specific *NFMA Recommended Best Practices in Disclosure Guidelines*.

This summary is being provided in to enable issuers, investment bankers, bond attorneys, financial advisors and consultants to more easily assemble operating data and utilization statistics to be included in official statements, annual reports filed pursuant to Rule 15c2-12 or in quarterly disclosure reports. Although considerable care has been taken to identify relevant information, this template is being provided in digital form to enable issuers and their agents to adapt it to their specific informational needs wherever modifications are deemed necessary and appropriate
